INDEX

Even and Odd Numbers

Even Numbers

Odd Numbers

Counting Forwards and Backwards

Counting Forwards

Complete the pattern

Counting Backwards

Complete the pattern

Number Lines

Comparing numbers (< = >)

Roman Numbers

Changing Roman Numbers to Arabic

Changing Arabic to Roman Numbers

Summary

Place Value

Expanded Notation – Junior

Value of the underlined digit

Writing numbers in words

Rounding Off (10, 100, 1000)

Number line method of rounding off

Fierce animal method of rounding off

Nearest 10

Peel off and throw away method of rounding off

Nearest 100

Nearest 1000

Rounding Off – Summary

Rounding Off with Money

Addition

- Properties of addition
- Addition is commutative
- Addition is associative
- Basic Addition Reinforcement – Dice
- Bonds of ten (10)
- Basic Addition Reinforcement – Mirror or white board
- Basic Addition Reinforcement – Flash cards or Deck of Cards
- Adding using Expanded Notation (without carry)
- Adding using Expanded Notation (with carry)
- Adding Vertically (↓) without carry
- Adding Vertically (↓) with carry
- Adding using estimation (rounding off)

Subtraction

- Properties of Subtraction
- Subtraction is not commutative
- Subtraction is the inverse (opposite) of addition
- Basic Subtraction Reinforcement – Dice
- Bonds of ten (10)
- Basic Subtraction Reinforcement – Mirror or white board
- Basic Subtraction Reinforcement – Flash cards or Deck of Cards
- Subtracting Vertically (↓) without borrowing
- Subtracting Vertically (↓) with borrowing
- Subtraction using Expanded Notation (without carry)

Multiplication

- Properties of Multiplication
- Multiplication is Commutative
- Multiplication can be grouped
- Repeated Addition
- Basic Multiplication Reinforcement – Dice
- Basic Multiplication Reinforcement – Mirror or white board
- Basic Multiplication Reinforcement – Flash or Deck of Cards
- Times Tables
- Multiplication 2-digits by 1-digit
- Traditional method – without carry
- Traditional method – with carry
- Multiplication 2-digits by 2-digits
- Traditional method (Golden zero)
- Multiplication using vertical expanded notation
- Grid Multiplication. (Lattice or Gelosia/ Chinese multiplication)
- Round off then multiply

Order of operations

Working with Brackets (Bodmas)

Fractions

Naming a fraction (Numerator & Denominator)

Fractions – Parts & Whole

Identifying Numerators and Denominators

Equivalent fractions

Fraction Wall

Adding fractions with same denominator

Fractions (Changing one denominator)

Comparing Fractions (\leq \Rightarrow)

Method 1: Fraction wall

Method 2: Changing Denominators

Method 3: Cross Multiplication

Multiplying of Fractions

Money

Money Arranging (Decimal numbers or numbers with commas)

Money Comparing (Decimal or numbers with commas) (\leq \Rightarrow)

Money Adding (Decimal numbers or numbers with a comma)

Money Subtracting (Decimal numbers or numbers with a comma)

Multiplying (10, 100 & 1000)

Factors Pairs and Multiples

Division

Long Division (One digit into two digits)

Long Division (One digit into three digits)

Long Division (Two digits into three digits) Extension

Short Division

Measurement

Time

Time – Things You Should Know

Abbreviations

Read, tell and write analogue time

Read, tell and write digital time

Time – Leap Years - Extension

Conversions

Conversions g – kg, m – km, ml – l

Converting from km, kg and l to m, g and ml

Converting from m, g and ml to km, kg and l

Conversions (Adding and Subtracting)

Conversions (Ascending and Descending)

Conversions – Comparing (< = >)
Instruments of Measurement – Pictures
Instruments that measure mass
Instruments that measure distance
Instruments that measure time
Instruments that measure capacity
Instruments that measure temperature

Shape and Space

Perimeter
Area
Volume
Geometry
Symmetry

Answers
